The training will explain your role in developmental monitoring and the importance of promoting developmental screening when there is a cause for concern. Room arrangement is a powerful teaching strategy when used well. **November 8<sup>th</sup> More Than Just Routine: Turn Everyday Infant Toddler Moments into Extraordinary! 6:30 -8:30 pm**

**Instructor: Karen Mintz, Infant-Toddler Specialist with Child Care Resources, Inc.**

What does the word “curriculum” mean to you? If teaching skills and planning projects are the first ideas that come to mind, then this workshop will open your eyes to a new way of thinking about infant-toddler “curriculum”. Infant and toddler teachers spend a large part of the day engaged in routine caregiving responsibilities. These are key learning times! Participants will gain an understanding of why routines are essential to “curriculum” for infants and toddlers. Participants will learn how responsive and respectful one-on-one caregiving routines are opportunities for building relationships and learning, and how these routines are connected to culture and family values. This training provides information that supports the ITERS-R subscales: Personal Care Routines, Listening and Talking, Interactions and Program Structure. (DCDEE 1, 3, 8). **(2.0 hrs./\$7.00)**

**December 4<sup>th</sup> Change Is Hard! But It Doesn’t Have to Hurt 6:30-8:30 pm**

**Instructor: Ellyn Andrews, Healthy Social Behavior Specialist with CCRI Inc.,**

Experts estimate that 20-30% of a young child’s day involves transitioning from one activity to another. That’s a lot of moving and a lot of wasted time! Unless teachers plan transitions as carefully and intentionally as they plan the rest of their day, that time can be stressful and frustrating for teachers and children alike.
